The Principal's Quick-Reference Guide to School Law Dennis R. Dunklee 2002 This book is designed to inform school administrators regarding school law. As a resource, it provides suggested, easy-to-understand guidelines for the avoidance of litigation. Subjects include preventive law and risk management; constitutional and statutory foundations of staff selection, contracting, and evaluation; negligent hiring, defamation, and referencing; performance evaluation; teachers' constitutional rights and terms and conditions of employment; students' rights; student discipline; the principal's responsibilities in providing special education services; academic issues and student records; copyright law; search and seizure; the principal's responsibilities in program management; sexual harassment; and the principal's tort liability for negligence as applied to expected duty and standards of care. Each chapter and section is presented in a template format for ease in locating answers to questions that arise in a particular situation. The book contains a quick-reference guide by subject, lists state Web sites for accessing state-specific education laws in the introductory chapter, and concludes with two resources (appendices) containing selected provisions from the U.S. Constitution that are of particular interest to educators. Also included is a listing, by subject-category, of leading education cases that have been decided by the U.S. Supreme Court. (RT)

Urban Vulnerability and Climate Change in Africa Stephan Pauleit 2015-04-13 Urbanisation and climate change are among the major challenges for sustainable development in Africa. The overall aim of this book is to present innovative approaches to vulnerability analysis and for enhancing the resilience of African cities against climate change-induced risks. Locally adapted IPCC climate change scenarios, which also consider possible changes in urban population, have been developed. Innovative strategies to land use and spatial planning are proposed that seek synergies between the adaptation to climate change and the need to solve social problems. Furthermore, the book explores the role of governance in successfully coping with climate-induced risks in urban areas. The book is unique in that it combines: a top-down perspective of climate change modeling with a bottom-up perspective of vulnerability assessment; quantitative approaches from engineering sciences and qualitative approaches of the social sciences; a novel multi-risk modeling methodology; and strategic approaches to urban and green infrastructure planning with neighborhood perspectives of adaptation.
