*Child of the Enlightenment* Arianne Baggerman 2009-01-01 A diary kept by a boy in the 1790s sheds new light on the rise of autobiographical writing in the 19th century and sketches a panoramic view of Europe in the Age of Enlightenment. The French Revolution and the Batavian Revolution in the Netherlands provide the backdrop to this study, which ranges from changing perceptions of time, space and nature to the thought of Jean-Jacques Rousseau and its influence on such far-flung fields as education, landscape gardening and politics. The book describes the high expectations people had of science and medicine, and their disappointment at the failure of these new branches of learning to cure the world of its ills.

*Magic in Western Culture* Brian P. Copenhaver 2015-09-09 The story of the beliefs and practices called 'magic' starts in ancient Iran, Greece, and Rome, before entering its crucial Christian phase in the Middle Ages. *Narratives of Enlightenment* Karen O'Brien 1997-06-05 *Narratives of Enlightenment* is an interdisciplinary study of cosmopolitan approaches to the past. It reappraises the work of five of the most important narrative historians of the century - Voltaire, David Hume, William Robertson, Edward Gibbon and the historian of the American Revolution, David Ramsay - in the context of political and national debates in France, Scotland, England and America; and it investigates the nature and degree of their intellectual investment in the idea of a common European civilisation. Karen O'Brien combines the methodologies of literary criticism and

intellectual history to explore debates about Enlightenments and the political uses of narrative. Where previous studies have emphasised the growth of nationalism in eighteenth-century literature, she reveals the development of cosmopolitan ways of thinking beyond national cultural issues.

*The Trek* David Schachne 2013-09-05 The Trek tells the story of David Schachne's adventure in November, 2004, attempting to summit Kala Patthar, a mountain which towers above Everest Base Camp in the Himalayas. At 18,192 feet above sea level, the summit of Kala Patthar offers successful climbers one of the most amazing views of Mount Everest (29,035 feet) without having to put your life at risk by entering the Khumbu Icefall, or by climbing Mount Lhotse or Mount Nuptse. Raised in Brooklyn, NY, Schachne loved visiting the great outdoors as a teenager, going camping and hiking in the Catskills and Adirondacks. Throughout his early adult life, he had a burning desire to go trekking in the Himalayas. He believed going there would make his life more fulfilled. Schachne certainly didn't expect his trek to be a "walk in the park", but he was ill-prepared for what was in store for him. Climbing for hours and hours each day while mentally and physically exhausted; confronting sub-freezing temperatures; dealing with illness, high altitude sickness, piercing headaches, wretched odors, utter filth, bacterial infections, dysentery and more, he endured two weeks of pure, nightmarish misery. In this riveting account of his gut-wrenching trek over fourteen sleepless days and nights, while malnourished, Schachne takes you along on each and every step of his journey. You'll experience the ups and downs of the hills and valleys, and the highs and lows of his personal triumphs and chaotic travails. He flies from Kathmandu in Nepal to the most dangerous airport in the world (Tenzing Hillary Airport), in a town called Lukla, then hikes to Phadking and Namche Bazaar, a virtual flea market at 11,000 feet, then Thyangboche Monastery and then Dingboche, Dzugla, Lobuche and Gorak Shep, before finally attempting the summit. Schachne reveals what originally led him to fall in love with nature, why he was so determined to go to the Himalayas, and why he persevered despite the brutal bodily punishment he experienced. Join Schachne for the most entertaining adventure of your life, as he takes you along on this thrilling, harrowing and laugh and cry-out-loud journey.

*War in the Age of Enlightenment, 1700-1789* Armstrong Starkey 2003 War in the 18th century war was a complex operation, including popular as well as conventional conflict, between Europeans and with non-Europeans. These conflicts influenced European intellectuals and contributed to the complexity of Enlightenment thought. While Enlightenment writers regarded war as the greatest evil confronting mankind, they had little hope that it could be eliminated; thus, peace proposals of the day were joined by more realistic discussion of the means by which war might be limited or rendered more humane. In this book, the author considers the influence of ideas and values on the actions of Enlightenment military personnel and how the rational spirit of the time influenced military thought, producing a military enlightenment that applied rational analysis to military tactics and to the composition of armies. In the late Enlightenment, military writers explored the psychological foundations of war as a means of stimulating a new military spirit among the troops. The Enlightenment was, however, not the only cultural influence upon war during this century. Religion, the traditional values of the ancien regime, and local values all contributed to the culture of force. When Europeans engaged in military encounters with peoples in other parts of the globe, cultural interchange inevitably occurred as well. Further, there is a revolutionary element that one must consider when defining the military culture. The result of all these factors was a creative tension in 18th century warfare and an extraordinarily complex military culture.

**Why Buddhism is True Robert Wright 2017-08-08** From one of America's most brilliant writers, a New York Times bestselling journey through psychology, philosophy, and lots of meditation to show how Buddhism holds the key to moral clarity and enduring happiness. At the heart of Buddhism is a simple claim: The reason we suffer—and the reason we make other people suffer—is that we don't see the world clearly. At the heart of Buddhist meditative practice is a radical promise: We can learn to see the world, including ourselves, more clearly and so gain a deep and morally valid happiness. In this “sublime” (The New Yorker), pathbreaking book, Robert Wright shows how taking this promise seriously can change your life—how it can loosen the grip of anxiety, regret, and hatred, and how it can deepen your appreciation of beauty and of other people. He also shows why this transformation works, drawing on the latest in neuroscience and psychology, and armed with an acute understanding of human evolution. This book is the culmination of a personal journey that began with Wright's landmark book on evolutionary psychology, *The Moral Animal*, and deepened as he immersed himself in meditative practice and conversed with some of the world's most skilled meditators. The result is a story that is “provocative, informative and...deeply rewarding” (The New York Times Book Review), and as entertaining as it is illuminating. Written with the wit, clarity, and grace for which Wright is famous, *Why Buddhism Is True* lays the foundation for a spiritual life in a secular age and shows how, in a time of technological distraction and social division, we can save ourselves from ourselves, both as individuals and as a species.

Foundations of the Metaphysics of Morals Immanuel Kant 1959 "The Foundations is for the general reader who possesses 'common rational knowledge of morality' but lacks a philosophical theory of it."--Translator's introduction.

Rome in the Age of Enlightenment Hanns Gross 1990 This is the only scholarly work in the English language on the city of Rome in the Age of the Enlightenment, and the only book in any language to treat this fascinating city in all its multifarious aspects. Professor Gross combines extensive archival research with the latest findings of other scholars to produce a uniquely rounded portrait of the papal capital, elegantly illustrated with contemporary engravings by Piranesi and others. The book is divided into two sections, in the first of which Professor Gross discusses the material and institutional structures of the city, including its demography, economy, food supply, and judicial systems. The second section considers aspects of intellectual, cultural, and artistic life. Professor Gross contends not only that ancien-regime Rome witnessed a decline in Counter-Reformation fervour, but that this decay resulted in a marked dissonance in the political, social, and cultural life of the city.

**Enlightenment Now Steven Pinker 2018-02-13** INSTANT NEW YORK TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF 2018 ONE OF THE ECONOMIST'S BOOKS OF THE YEAR "My new favorite book of all time." --Bill Gates If you think the world is coming to an end, think again: people are living longer, healthier, freer, and happier lives, and while our problems are formidable, the solutions lie in the Enlightenment ideal of using reason and science. By the author of the new book, Rationality. Is the world really falling apart? Is the ideal of progress obsolete? In this elegant assessment of the human condition in the third millennium, cognitive scientist and public intellectual Steven Pinker urges us to step back from the gory headlines and prophecies of doom, which play to our psychological biases. Instead, follow the data: In seventy-five jaw-dropping graphs, Pinker shows that life, health, prosperity, safety, peace, knowledge, and happiness are on the rise, not just in the West, but worldwide. This progress is not the result of some cosmic force. It is a gift of the Enlightenment: the conviction that reason and science can enhance human flourishing. Far from being a naïve hope, the Enlightenment, we now know, has worked. But more than ever, it needs a vigorous defense. The Enlightenment project swims against currents of human nature--tribalism, authoritarianism, demonization, magical thinking--which demagogues are all too willing to exploit. Many commentators, committed to political, religious, or romantic ideologies, fight a rearguard action against it. The result is a corrosive fatalism and a willingness to wreck the precious institutions of liberal democracy and global cooperation. With intellectual depth and literary flair, Enlightenment Now makes the case for reason, science, and humanism: the ideals we need to confront our problems and continue our progress.

SCM Studyguide: Philosophy and the Christian Faith Ben Pugh 2018-12-04 The challenges that Western culture keeps posing to the Christian faith are ever new. The goal-posts keep changing. This study guide will equip theology students to understand the culture-shaping beliefs that are driving the kinds of questions it brings to faith. It will be an historical overview of the key stages in the history of Western philosophy with each section carefully tracing the genealogical line of ideas and the Christian responses to them, right up to the present day. For most theology students, learning abstract philosophical concepts involves literally learning a new language, a language that the initiated converse in with ease but which leaves the uninitiated baffled. Thus, each chapter in this study guide opens with a glossary of terms. Throughout the studyguide students are encouraged to reflect on the ways in which what has been learned might be applied in both explicitly theological and wider cultural contexts - for example, they might be asked to think of a film or book that seems to express elements of existentialism or postmodernism, or to describe how something very like the extreme subjectivity of idealism can sometimes show itself in Sunday morning worship.

*Leviathan* Thomas Hobbes 2018-08-22 *Leviathan or The Matter, Forme and Power of a Commonwealth Ecclesiastical and Civil* is a book written by an English materialist philosopher Thomas Hobbes about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man. Hobbes uses this character to describe a powerful state ("God of the death"). He starts with a postulate about a natural human state ("the war of all against all") and develops the idea "man is a wolf to a man". When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights – to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.

Enlightenment Kim Sloan 2003 The Enlightenment was a period of intense activity devoted to discovery and learning about the natural world, the past and other civilizations. Classification, collecting and deciphering were all important stages on the way to understanding the world and its inhabitants. The King's Library was built to house the books donated from the royal libraries of King George II and his grandson King George III, and they epitomize the interest in the late 18th and early 19th centuries in scholarship and study. Aimed at the general reader and relevant to many academic disciplines, this book explores the ways people acquired new information, organized their ideas and reached their conclusions.
