Nia and the New Free Library Ian Lendler 2021-06 This picture book tells the story of one girl who reminds an entire town of the joy of books. When the town's old library is destroyed by a tornado, the people are left wondering: What should they do with the space where the library used to be? The characters in Nia and the New Free Library all want different things: the builder wants there to be a new skyscraper, the grocer wants a new parking lot, but Nia just wants a new library . . . but how can one person build a whole library? • Explores the power of community and what a group can accomplish • Teaches the importance of working together toward a common goal • Reminds readers of the important role libraries play in community, and how they work Sometimes the biggest things can start with almost nothing at all. Ian Lendler and Mark Pett bring humor and heart to this clever twist on the classic "Stone Soup" folktale. • This triumphant ode to the magic of sharing stories is sure to strike a chord with bibliophiles of all genres, ages, and stripes. • Perfect for children ages 5 to 8 years old • Great for parents and grandparents, as well as librarians, teachers, and educators • You'll love this book if you love books like Stone Soup by Marcia Brown, Delivering Your Mail by Ann Owen, and Seeds and Trees by Brandon Walden.

The Relentless Moon Mary Robinette Kowal 2020-07-14 Finalist 2021 Hugo Award for Best Novel! Finalist 2021 Hugo Award for Best Series! A 2021 Locus Award Finalist! Mary Robinette Kowal continues her Hugo and Nebula award-winning Lady Astronaut series, following The Calculating Stars and The Fated Sky, with The Relentless Moon. The Earth is coming to the boiling point as the climate disaster of the Meteor strike becomes more and more clear, but the political situation is already overheated. Riots and sabotage plague the space program. The IAC's goal of getting as many people as possible off Earth before it becomes uninhabitable is being threatened. Elma York is on her way to Mars, but the Moon colony is still being established. Her friend and fellow Lady Astronaut Nicole Wargin is thrilled to be one of those pioneer settlers, using her considerable flight and political skills to keep the program on track. But she is less happy that her husband, the Governor of Kansas, is considering a run for President. Digital Apollo David A. Mindell 2011-09-30 How human pilots and automated systems worked together to achieve the ultimate in flight—the lunar landings of NASA's Apollo program. As Apollo 11's Lunar Module descended toward the moon under automatic control, a program alarm in the guidance computer's software nearly caused a mission abort. Neil Armstrong responded by switching off the automatic mode and taking direct control. He stopped monitoring the computer and began flying the spacecraft, relying on skill to land it and earning praise for a triumph of human over machine. In Digital Apollo, engineer-historian David Mindell takes this famous moment as a starting point for an exploration of the relationship between humans and computers in the Apollo program. In each of the six Apollo landings, the astronaut in command seized control from the computer and landed with his hand on the stick. Mindell recounts the story of astronauts' desire to control their spacecraft in parallel with the history of the Apollo Guidance Computer. From the early days of aviation through the birth of spaceflight, test pilots and astronauts sought to be more than "spam in a can" despite the automatic controls, digital computers, and software developed by engineers. Digital Apollo examines the design and execution of each of the six Apollo moon landings, drawing on transcripts and data telemetry from the flights, astronaut interviews, and NASA's extensive archives. Mindell's exploration of how human pilots and automated systems worked together to achieve the ultimate in flight—a lunar landing—traces and reframes the debate over the future of humans and automation in space. The results have

implications for any venture in which human roles seem threatened by automated systems, whether it is the work at our desktops or the future of exploration.

Spaceman Mike Massimino 2016-10-04 NEW YORK TIMES BESTSELLER • Have you ever wondered what it would be like to find yourself strapped to a giant rocket that's about to go from zero to 17,500 miles per hour? Or to look back on Earth from outer space and see the surprisingly precise line between day and night? Or to stand in front of the Hubble Space Telescope, wondering if the emergency repair you're about to make will inadvertently ruin humankind's chance to unlock the universe's secrets? Mike Massimino has been there, and in *Spaceman* he puts you inside the suit, with all the zip and buoyancy of life in microgravity. Massimino's childhood space dreams were born the day Neil Armstrong set foot on the moon. Growing up in a working-class Long Island family, he catapulted himself to Columbia and then MIT, only to flunk his first doctoral exam and be rejected three times by NASA before making it through the final round of astronaut selection. Taking us through the surreal wonder and beauty of his first spacewalk, the tragedy of losing friends in the Columbia shuttle accident, and the development of his enduring love for the Hubble Telescope—which he and his fellow astronauts were tasked with saving on his final mission—Massimino has written an ode to never giving up and the power of teamwork to make anything possible. *Spaceman* invites us into a rare, wonderful world where science meets the most thrilling adventure, revealing just what having "the right stuff" really means.

Mousetronaut Mark Kelly 2012-10-09 A #1 New York Times bestseller "This little mouse may well inspire some big

dreams.” —Kirkus Reviews “In this picture book based on the space shuttle Endeavor... Meteor is one of the smallest mice, but the most hardworking...the values of being small, useful, solving problems, and working hard—as opposed to being big and strong—will inspire young readers.” —School Library Journal “Inspired by this real-life mouse, Kelly’s first children’s book tells the story of Meteor, a lightly anthropomorphized rodent who turns his tininess into an advantage when an important key gets stuck in a crack between two monitors...textured images and vivid portraits that make it absolutely clear that space travel is a larger-than-life adventure.” —Publishers Weekly A heartwarming picture book tale of the power of the small, from bestselling author and retired NASA astronaut Commander Mark Kelly. Astronaut Mark Kelly flew with “mice-tronauts” on his first spaceflight aboard space shuttle Endeavour in 2001. Mousetronaut tells the story of a small mouse that wants nothing more than to travel to outer space. The little mouse works as hard as the bigger mice to show readiness for the mission . . . and is chosen for the flight! While in space, the astronauts are busy with their mission when disaster strikes—and only the smallest member of the crew can save the day. With lively illustrations by award-winning artist C. F. Payne, Mousetronaut is a charming tale of perseverance, courage, and the importance of the small!

Through the Glass Ceiling to the Stars Eileen M. Collins 2021-10-19 The long-awaited memoir of a trailblazer and role model who is telling her story for the first time. Eileen Collins was an aviation pioneer her entire career, from her crowning achievements as the first woman to command an American space mission as well as the first to pilot the space shuttle to her early years as one of the Air Force's first female pilots. She was in the first class of women to earn pilot's wings at Vance Air Force Base and was their first female instructor pilot. She was only the second woman pilot admitted to the Air Force's elite Test Pilot Program at Edwards Air Force Base. NASA had such confidence in her skills as a leader and pilot that she was entrusted to command the first shuttle mission after the Columbia disaster, returning the US to spaceflight after a two-year hiatus. Since retiring from the Air Force and NASA, she has served on numerous corporate boards and is an inspirational speaker about space exploration and leadership. Eileen Collins is among the most recognized and admired women in the world, yet this is the first time she has told her story in a book. It is a story not only of achievement and overcoming obstacles but of profound personal transformation. The shy, quiet child of an alcoholic father and struggling single mother, who grew up in modest circumstances and was an unremarkable student, she had few prospects when she graduated from high school, but she changed her life to pursue her secret dream of becoming an astronaut. She shares her leadership and life lessons throughout the book with the aim of inspiring and passing on her legacy to a new generation.

The Dream Life of Astronauts Patrick Ryan 2016-07-05 For readers of Tom Perrotta and Lorrie Moore, these nine unforgettable stories, all set in and around Cape Canaveral, showcase Patrick Ryan's masterly understanding of regret and hope, relationships and family, and the universal longing for love. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY St. Louis Post Dispatch • Refinery 29 • Electric Literature *The Dream Life of Astronauts* balances heartbreak with wry humor as its characters try to make sense of the paths they find themselves on. A would-be Miss America auditions for a shady local talent scout over vodka and Sunny D; a NASA engineer begins to wonder if the woman he's having an affair with is slowly poisoning her husband; a Boy Scout troop leader, recovering from a stroke, tries to protect one of his scouts from being bullied by his own sons; an ex-mobster living in witness protection feuds with the busybody head of his condo board; a grandmother, sentenced to driver's ed after a traffic accident, surprises herself by falling for her instructor. Set against landmark moments—the first moon launch, Watergate, the Challenger explosion—these private dramas unfurl in startling ways. *The Dream Life of Astronauts* ratifies the emergence of an indelible new talent in fiction. Praise for *The Dream Life of Astronauts* “[Ryan] displays a gift for excavating the dashed hopes and yearnings that lie beneath. He is especially adept at capturing the point of view of children, with a Salingeresque understanding of their alienation, their vulnerability, their keen powers of observation.”—Michiko Kakutani, *The New York Times* “Quietly commanding . . . A wry and smart collection—a beam of intelligent life from an author who clearly likes to probe the outer edges of the familiar.”—Maureen Corrigan, NPR's *Fresh Air* “Ryan is a master of that old-fashioned, captivating storytelling that deceptively reads as effortless. . . . Ryan never actually sends his characters into space; but his orbits of the human heart are enough.”—*The New York Times Book Review* “Ryan brings a wry sense of intimacy to these dreamers who are always searching for a better life, for something new.”—BBC “Patrick Ryan's short stories go down lightly—but that doesn't mean they're lightweight. In the best of them, Ryan's transparent prose and seemingly casual tone sneakily ensnare you in tough moments and wryly rueful deflations of the heart and spirit.”—*The Seattle Times* “You don't have to be a rocket scientist to appreciate this funny collection of stories set around Cape Canaveral. Moon missions and shuttle launches take a backseat to the earthly predicaments faced by the eclectic cast of Boy Scouts, gangsters, grandmothers and beauty queens.”—*The Atlanta Journal-Constitution* “There is humanity and heart in each one of these tales, all rendered with nuance and depth that will leave a mark on your thoughts long past the final pages.”—Refinery29 “Patrick Ryan's characters are people who are a little more beaten down than they know. They are not introspective by default, and yet, due to circumstances, they are forced to look into themselves and find something that, in his own phrase, feels like life.”—Literary Hub “The author illuminates [his] characters with pitch-perfect dialogue and period references that capture the various decades in which the stories take place.”—Publishers Weekly

The Earth Gazers Christopher Potter 2017-09-07 The most beautiful and influential photographs ever made were of the whole earth seen from space. They were taken from the moon, almost as an afterthought, by the astronauts of the Apollo space programme. They inspired a generation to think more seriously about our responsibility for this tiny oasis in space, the 'blue marble' falling through empty darkness. This is a book about the long road to the capture of those unforgettable images. It is a history of the space programme and of the ways in which it transformed our view of the earth and changed the lives of the astronauts who walked in space and on the moon. It is the story of the often blemished visionaries who inspired that journey into space: Charles Lindbergh, Robert Goddard and Wernher Von Braun, and of the courageous pilots who were the first humans to escape the Earth's orbit.

God is an Astronaut Alyson Foster 2014-07-01 The day of the accident, Jess is in the backyard with a chainsaw, clearing space to build the greenhouse she's always wanted. And, as always, she is thinking of Arthur. Arthur, her colleague in the botany department, who never believed she'd actually start the project. Arthur, who, after getting too close, has cut off contact, escaping to study the subarctic pines. But now there has been a disaster, connected to her husband's space tourism company: the explosion of a space shuttle filled with commercial passengers, igniting a media frenzy on her family's doorstep. Jess's engineer husband is implicated, and she knows there is information he's withholding, even as she becomes an unwitting player in the efforts to salvage the company's reputation. Struggling, Jess writes to the only person she can be candid with. She writes to Arthur. And in her e-mails -- warm, frank, yet freighted with regret and the old habits of seduction -- Jess tries to untangle how her life has changed, in one instant but also slowly, and how it might change still. With sure pacing and intimate wisdom, *God is an Astronaut* unfurls a story of secrets and of wonderment, the unforgettable and the vast unknowable.
