Target Centred Virtue Ethics Christine Swanton 2021-04-15 Christine Swanton presents a new target centred virtue ethics, which is opposed to orthodox virtue ethics in two major ways. She rejects the 'natural goodness' metaphysics of neo-Aristotelian virtue ethics in favour of a 'hermeneutic ontology' of ethics, and she offers a new target centred framework for assessing rightness of acts.

Our Stories John Martin Fischer 2009-05-06 In this collection of essays on the metaphysical issues pertaining to death, the meaning of life, and freedom of the will, John Martin Fischer argues (against the Epicureans) that death can be a bad thing for the individual who dies. He defends the claim that something can be a bad thing--a misfortune--for an individual, even if he never experiences it as bad (and even if he does not any longer exist). Fischer also defends the commonsense asymmetry in our attitudes toward death and prenatal nonexistence: we are indifferent to the time before we are born, but we regret that we do not live longer. Further, Fischer argues (against the immortality curmudgeons, such as Heidegger and Bernard Williams), that immortal life could be desirable, and shows how the defense of the (possible) badness of death and the (possible) goodness of immortality exhibit a similar structure; on Fischer's view, the badness of death and the goodness of life can be represented on spectra that display certain continuities. Building on Fischer's previous book, *My Way* a major aim of this volume is to show important connections between issues relating to life and death and issues relating to free will. More specifically, Fischer argues that we endow our lives with a certain distinctive kind of meaning--an irreducible narrative dimension of value--by exhibiting free will. Thus, in acting freely, we transform our lives so that our stories matter.

Ecofeminism Greta Gaard 1993-01-14 Drawing on the insights of ecology, feminism, and socialism, ecofeminism's basic premise is that the ideology that authorizes oppression based on race, class, gender, sexuality, physical abilities, and species is the same ideology that sanctions the oppression of nature. In this collection of essays, feminist scholars and activists discuss the relationships among human

begins, the natural environment, and nonhuman animals. They reject the nature/culture dualism of patriarchal thought and locate animals and humans within nature. The goal of these twelve articles is to contribute to the evolving dialogue among feminists, ecofeminists, animal liberationists, deep ecologists, and social ecologists in an effort to create a sustainable lifestyle for all inhabitants of the earth. Among the issues addressed are the conflicts between Green politics and ecofeminism, various applications of ecofeminist theory, the relationship of animal liberation to ecofeminism, harmful implications of the romanticized woman-nature association in Western culture, and cultural limitations of ecofeminism. In the series *Ethics and Action*, edited by Tom Regan.

The CCC Chronicles Alfred Emile Cornebise 2004-04-02 When Franklin Delano Roosevelt founded the Civilian Conservation Corps in 1933, newspapers relating to the organization were launched almost immediately. *Happy Days*, the semi-official newspaper of the CCC, and other such publications served as soundings boards for opinions among the CCC enrollees, encouraged and instructed the men as they assumed their new roles, and generally supported the aims of Roosevelt's New Deal program. *Happy Days* also encouraged and instructed editors in the production of camp newspapers—well over 5,000 were published by almost 3,000 of the CCC companies from 1933 to 1942. This book considers all phases of life in the CCC throughout its existence from various perspectives, and analyzes the history of CCC camp journalism. As the author points out, the CCC newspapers were and still are significant because they provide readers with a look at American life—socially, politically, culturally and militarily—during the Great Depression. It also focuses on how *Happy Days* and other newspapers were created and distributed, who wrote for them, and what they contained.

**Ethics of Belief: Essays in Tribute to D.Z. Phillips Eugene Thomas Long 2008-02-28 Eugene Thomas Long**  
Originally published in the International Journal for Philosophy of Religion, Volume 63, Nos 1-3. DOI: 10.1007/s11153-007-9155-4 © Springer Science+Business Media B. V. 2007 This volume is presented as a tribute to the life and work of D. Z. Phillips. Six of the articles were originally presented at the annual conference on the philosophy of religion organized by Phillips and held at Claremont Graduate University, February 9-10, 2007. Unfortunately, Phillips did not live to participate in the conference itself. He died unexpectedly July 25, 2006 in the library of his beloved University of Wales, Swansea. Previously published volumes of essays, based on conferences organized by Phillips in Claremont, included a chapter entitled, "Voices in Discussion," in which Phillips provided his own reactions to the discussions written almost immediately after the conference. Sadly, this volume appears without the addition of his voice. Born in Morriston, near Swansea, Phillips was a Welsh speaker, a strong supporter of Welsh speaking schools and the author of many works in philosophy and literature in Welsh and English. Known widely as the leading representative of the movement in the philosophy of religion called Wittgensteinianism, Phillips spent much of his effort challenging the tendency of philosophers to elevate one kind of discourse to the point where it becomes the norm by which other forms of discourse are to be judged.

**Why are quotations in academic papers taken from only secondary sources problematic? Sandra Intemann 2016-07-15** Essay from the year 2016 in the subject Philosophy - Practical (Ethics, Aesthetics, Culture, Nature, Right, ...), grade: 1,3, Leuphana Universität Lüneburg (Wissenschaftsethik), language: English, abstract: To find out whereas quotations in academic articles and/or monographs solely out of secondary and not primary sources are problematic from the perspective of academic ethics in general and business ethics in particular one will first have a closer look on the key terms. An academic article is a scientific text published in a scientific journal and supervised by other scientists. A monograph is a scientific text about a single subject by one author. Sources are distinguished in primary and secondary sources; primary sources are scientific research results which are published at first hand containing. Secondary sources refer to a primary source which was published by another author and not collected by the author himself. For an evaluation of the use of the sources in a business or academic environment ethical standards and moralities are used. Within academic ethics scientists have the duty to act responsibly and to define moralities for their practice and the way they do research and publish their results. On the other hand the business ethics defines right or wrong behaviour in a business context. To discuss whereas the use of secondary sources is problematic one will analyse the involved parties which are the users of the sources, the author of the primary source, the author of the secondary source and the scientific community. Within all parties involved in the problem there is always a least privileged party according to John Rawls. On the one hand using solely sources could be interpreted as one kind of plagiarism even if the source is cited correctly. Further the readers do not make an own effort into research because she takes the easy way out using solely secondary sources. The readers have to wonder whether it is legitimate to rely on the author of the secondary source that he summarized, analysed etc. the primary source correctly. It would have a massive negative impact on academic and business ethics if the author of the secondary source made a mistake in summarizing, analysing or wrong conclusion drawing. As a result, wrong information would be used for following work in business areas or research in academic areas. On the other hand the access to primary sources may be difficult or even not possible, so the use of a secondary source is the only way to use the information. Further one has to wonder whether it is legal to intervene to solely use secondary sources as it violates the copyright law.

**Essays on Ethics, Social Behaviour, and Scientific Explanation** J.C. Harsanyi 1976-12-31 When John Harsanyi came to Stanford University as a candidate for the Ph.D., I asked him why he was bothering, since it was most unlikely that he had anything to learn from us. He was already a known scholar; in addition to some papers in economics, the first two papers in this volume had already been published and had dazzled me by their originality and their combination of philosophical insight and technical competence. However, I am very glad I did not discourage him; whether he learned anything worthwhile I don't know, but we all learned much from him on the foundations of the theory of games and specifically on the outcome of bargaining. The central focus of Harsanyi's work has continued to be in the theory of games, but especially on the foundations and conceptual problems. The theory of games, properly understood, is a very broad approach to social interaction based on individually rational behavior, and it connects closely with fundamental methodological and substantive issues in social science and in ethics. An indication of the range of Harsanyi's interest in game theory can be found in the first paper of Part B - though in fact his own contributions are much broader - and in the second paper the applications to the methodology of social science. The remaining papers in that section show more specifically the richness of game theory in specific applications.

**How to Play Video Games** Nina Huntemann 2019-03-26 Forty original contributions on games and gaming culture What does Pokémon Go tell us about globalization? What does Tetris teach us about rules? Is feminism boosted or bashed by Kim Kardashian: Hollywood? How does BioShock Infinite help us navigate world-building? From arcades to Atari, and phone apps to virtual reality headsets, video games have been at the epicenter of our ever-evolving technological reality. Unlike other media technologies, video games demand engagement like no other, which begs the question - what is the role that video games play in our lives, from our homes, to our phones, and on global culture writ large? How to Play Video Games brings together forty original essays from today's leading scholars on video game culture, writing about the games they know best and what they mean in broader social and cultural contexts. Read about avatars in Grand Theft Auto V, or music in The Legend of Zelda: Ocarina of Time. See how Age of Empires taught a generation about postcolonialism, and how Borderlands exposes the seedy underbelly of capitalism. These essays suggest that understanding video games in a critical context provides a new way to engage in contemporary culture. They are a must read for fans and students of the medium.

What is the best path through the tangle of ethical issues surrounding the collapse of

the east coast fishery? What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice? It is the first Canadian collection of its kind. The book is divided into sections detailing with such topics as the environment and the economy; ethical issues relating to non-human animals; issues of gender; and issues relating to native peoples. (Examples include essays on animal rights and the case of native hunters; surface mining in Northern Ontario, the Quebec arctic; and fishing communities in the Maritimes.) *Trends in business ethics* Cees van Dam 2012-12-06 In August 1976 the research seminar 'Decision-making in business' was organized at Nijenrode, The Netherlands School of Business. More than fifty scientists and practitioners from nine countries presented research papers in one of the six discussion groups. Some of them also presented some of their ideas in front of a large mixed audience at a one-day symposium. Many of the papers presented at Nijenrode were of such a high quality that the decision to publish a selection of them was an easy one. At the same time the new series Nijenrode studies in business was initiated. All who were involved, the policy committee 'Of the Nijenrode studies, the advisory and editorial board of the series, the publisher, and the organizing committee of the seminar and symposium, acclaimed the idea of publishing three volumes in the new series. A collection of eleven papers could be grouped under the title *Trends in managerial and financial accounting*, and has been published as volume 1 of this series. A collection of fourteen papers has been published as the second volume under the title *Trends in financial decision making*, while this volume, consisting of twelve papers (and an introduction) explores the theme *Trends in business ethics*. The introduction by Stanley L. Jakiwas written for the symposium. It suggests why the papers of Pjotr Hesseling, Antoine Kreykamp, and Richard H. Viola, which were not presented at Nijenrode, are introduced here.
