**Cultural Tourism Hilary du Cros 2020-04-19** *Cultural Tourism remains the only book to bridge the gap between cultural tourism and cultural and heritage management. The first edition illustrated how heritage and tourism goals can be integrated in a management and marketing framework to produce sustainable cultural tourism. The current edition takes this further to base the discussion of cultural tourism in the theory and practice of cultural and heritage management (CM and CHM), under the understanding that for tourism to thrive, a balanced approach to the resource base it uses must be maintained. An 'umbrella approach' to cultural tourism represents a unique feature of the book, proposing solutions to achieve an optimal outcome for all sectors. Reflecting the many important developments in the field this new edition has been completely revised and updated in the following ways: New content on increasingly relevant topics including sustainability, climate change, the threat of de-globalization, overtourism and social media. New sections on experience creation, accessibility and inclusivity, as well as expanded material on creative industries and new management challenges. New international case studies and tried-and-tested assignment exercises have been added to every chapter. Written by experts in both tourism and cultural heritage management, this book will enable professionals and students to gain a better understanding of their own and each other's roles in achieving sustainable cultural tourism. *Ecotourism's Promise and Peril Daniel T. Blumstein 2017-10-09 Intended as a guide for wildlife managers and ecotourism operators, as well as interested ecotourists, this book addresses the biological principles governing how ecotourism affects wildlife. The introductory chapters focus on four key responses to human visitation—behavioral, physiological, ecological, and evolutionary. Readers will discover ecotourism's effects on biodiversity in connection with various industries that are habitat or taxonomically specific: fish tourism (including both freshwater and marine), marine mammal tourism, the huge industry centered on terrestrial animals, and the well-studied industry of penguin tourism. Given that the costs and benefits of ecotourism cannot be meaningfully assessed without understanding the human context, particular attention is given to how ecotourism has been used as part of community development. In closing, the book synthesizes the current state of knowledge regarding best practices for reducing human impacts on wildlife. The final chapter highlights key research questions that must be addressed to provide more evidence-based guidelines and policy.*

**The Routledge Handbook of Tourism and Sustainability** C. Michael Hall 2015-02-11 Routledge Handbook of Tourism and Sustainability from C. Michael Hall, Stefan Gössling, Daniel Scott is one of the winners of the ITB BookAwards 2016 in the category Specialist tourism literature! Sustainability remains one of the major issues in tourism today. Concerns over climate and environmental change, the fallout from the global economic and financial crisis, and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to tourism, however they be defined. Given the centrality of sustainability in tourism curricula, policies, research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability. This timely Handbook of Tourism and Sustainability is developed from specifically commissioned original contributions from recognised authors in the field, providing a systematic guide to the current state of knowledge on this area. It is interdisciplinary in coverage and international in

scope through its authorship and content. The volume commences with an assessment of tourism's global environmental, e.g. climate, emissions, energy use, biodiversity, water use, land use, and socio-economic effects, e.g. economic impacts, employment and livelihoods, culture. This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability, management tools and approaches, and the approaches used in different tourism and travel industry sectors. The book concludes by examining emerging and future concerns in tourism and sustainability such as peak-oil, post-carbon tourism, green economy and transition tourism. This is essential reading for students, researchers and academics interested in the possibilities of sustainable forms of tourism and tourism's contribution to sustainable development. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability of tourism will be measured for years to come.

Providing interdisciplinary insights from leading international scholars, this is the first book to critically examine the current status of community-based tourism. Organised into five parts, the Handbook provides cutting-edge perspectives on issues such as Indigenous communities, tourism and the environment, sustainability, and the impact of digital communities. Part 1 introduces core concepts and methodologies, and distinguishes community products from other tourism and hospitality goods. Part 2 explores communities' attitudes towards tourism development and their engagement with and ownership of the process. It also delves into the role of community-based tourism, under the influence of governmental policies, in the economic and social development of a region. In Part 3 various management, marketing, and branding initiatives are identified as a means of expanding the tourism business. Part 4 examines the negative impacts of mass tourism and its threats to culture, tradition, identity, the built environment, and natural heritage. In the final and fifth part, future challenges and opportunities for community-based tourism initiatives are considered, and research-based sustainable solutions are proposed. Overall, the book considers engaging local populations in tourism development as a way of building stronger and more resilient communities. This Handbook fills a void in the current research and thus will appeal to scholars, students, and practitioners interested in tourism management, tourism geography, business studies, development policy and practice, regional development, conservation, and sustainability.

**The Routledge Handbook of Animal Ethics Bob Fischer 2019-12-18 There isn't one conversation about animal ethics. Instead, there are several important ones that are scattered across many disciplines. This volume both surveys the field of animal ethics and draws professional philosophers, graduate students, and undergraduates more deeply into the discussions that are happening outside of philosophy departments. To that end, the volume contains more nonphilosophers than philosophers, explicitly inviting scholars from other fields—such as animal science, ecology, economics, psychology, law, environmental science, and applied biology, among others—to bring their own disciplinary resources to bear on matters that affect animals. The Routledge Handbook of Animal Ethics is composed of 44 chapters, all appearing in print here for the first time, and organized into the following six sections: I. Thinking About Animals II. Animal Agriculture and Hunting III. Animal Research and Genetic Engineering IV. Companion Animals V. Wild Animals: Conservation, Management, and Ethics VI. Animal Activism The chapters are brief, and they have been written in a way that is accessible to serious undergraduate students, regardless of their field of study. The volume covers everything from animal cognition to the state of current fisheries, from genetic modification to intersection animal activism. It is a resource designed for anyone interested in the moral issues that emerge from human interactions with animals.**

**The Ecotourism-Extraction Nexus Bram Büscher 2013-08-15 Ecotourism and natural resource extraction may be seen as contradictory pursuits, yet in reality they often take place side by side, sometimes even supported by the same institutions. Existing academic and policy literatures generally overlook the phenomenon of ecotourism in areas concurrently affected by extraction industries, but such a scenario is in fact increasingly common in resource-rich developing nations. This edited volume conceptualises and empirically analyses the 'ecotourism-extraction nexus' within the context of broader rural and livelihood changes in the places where these activities occur. The volume's central premise is that these seemingly contradictory activities are empirically and conceptually more alike than often imagined, and that they share common ground in ethnographic lived experiences in rural settings and broader political economic structures of power and control. The book offers theoretical reflections on why ecotourism and natural resource extraction are systematically decoupled, and epistemologically and analytically re-links them through ethnographic case studies drawing on research from around the world. It should be of interest to students and professionals engaged in the disciplines of geography, anthropology and development studies.**

***Outdoor Studies is the first book to attempt to define and survey the multi-disciplinary set of approaches that constitute the broad field of outdoor studies, including outdoor recreation, outdoor education, adventure education, environmental studies, physical culture studies and leisure studies. It reflects upon the often haphazard development of outdoor studies as a discipline, critically assesses current knowledge in outdoor studies, and identifies further opportunities for future research in this area. With a broader sweep than any other book yet published on the topic, this handbook traces the philosophical and conceptual contours of the discipline, as well as exploring key contemporary topics and debates, and identifying important issues in education and professional practice. It examines the cultural, social and political contexts in which people experience the outdoors, including perspectives on outdoor studies from a wide range of countries, providing the perfect foundation for any student, researcher, educator or outdoors practitioner looking to deepen their professional knowledge of the outdoors and our engagement with the world around us.***

***Routledge Handbook of Ecotourism David A. Fennell 2021-09-22 This handbook presents a timely, broad-ranging, and provocative overview of the essential nature of ecotourism. The chapters will both advance the existing central themes of ecotourism and provide challenging and divergent observations that will thrust ecotourism into new areas of research, policy, and practice. The volume is arranged around four key themes: sustainability, ethics and identity, change, conflict, and consumption, and environment and learning, with a total of 28 chapters. The first section focuses on sustainability as a core ecotourism criterion, with a primary focus on some of the macro sustainability issues that have an impact on ecotourism. Foremost among these topics is the linkage to the UN's Sustainable Development Goals, which have relevance to ecotourism as one of the greenest or most responsible forms of tourism. The chapters in the second section provide a range of different topics that pull ecotourism research into new directions, including a chapter on enriching indigenous ecotourism through culturally sensitive universalism. The third section includes chapters on topics ranging from persons with disabilities as a neglected body of research in ecotourism, to ecotourism as a form of luxury consumption. The final section emphasises the link between ecotourism and learning about the natural world, including a deeply theoretical chapter on rewilding Europe. With contributions from authors around the world, this handbook gives a global platform to local voices, in both developed and emerging country contexts. The multidisciplinary and international Routledge Handbook of Ecotourism will be of great interest to researchers, students, and practitioners working in tourism and sustainability.***

***Ecotourism, NGOs and Development Jim Butcher 2007-03-12 Ecotourism has emerged over the last twenty years not just as a market niche, but also as a strategy for combining development with conservation in the developing world. Ecotourism, NGOs and Development considers the basis for advocacy and argues that it is premised upon a very limited and limiting view of the potential for development. Jim Butcher examines the advocacy of tourism as sustainable development in a range of NGOs and within the general literature. The research reveals that in spite of the plethora of critical commentaries on the operation of ecotourism projects, there is generally an uncritical take on the ideological basis of the projects. This book offers a timely critique of key assumptions underlying ecotourism's status as sustainable development, arguing that ecotourism as development strategy ties the fate of some of the poorest people on the planet to localized environmental imperatives.***

***Handbook of Geotourism Ross Dowling 2018-10-26 Ross K. Dowling and David Newsome present an original, substantial and much-needed contribution to the field to further our understanding of geotourism in theory and practice. *The Routledge Handbook of Tourism and the Environment Andrew Holden 2012 The Routledge Handbook of Tourism and the Environment explores and critically evaluates the debates and controversies inherent to tourism's relationship with nature, especially pertinent at a time of major re-evaluation of our relationship with the environment as a consequence of the environmental problems we now face. It brings together leading specialists from range of disciplinary backgrounds and geographical regions, to provide state-of-the-art theoretical reflection and empirical research on this complex relationship and future direction. The book is divided in to five interrelated sections. Section one evaluates the philosophical basis, rationale and complexity of what is meant by the term 'environment' considering the major influences in the construction of how we understand our surroundings and the types of values we place upon them. Section two evaluates the types of eco-systems that are used as natural resources for tourism and the negative and positive impacts upon them. Section three evaluates relevant environmental policy and management mechanisms for the impacts of tourism on the natural environment. Section four focuses on the changing tourism-environment relationship, and the types of tourism that have become established in the tourism industry, market and policy. *Transnational Interconnections of Nature Studies and the Environmental Humanities Sophia Emmanouilidou 2020-02-24 How is ecotourism articulated in varied research fields? What are the conjunctions and concurrences of academic endeavors in the attempt to curb environmental destruction? This collection of essays offers a multifaceted exploration of the basic tenets of environmentalism proposed by academic curricula across the world. Ecodestruction, the wilderness, rampant pollution, tourism developments, sustainability, educational interventions, and the plurivocal turn to ecotheoretical textual analysis are some of the critical perspectives and scientific findings investigated here. The book introduces a multilateral understanding of environmental consciousness, and suggests that the study of nature should not be compartmentalized into separate fields of analyses, but aim for the interconnections between disciplines, given that the physical cosmos is an unambiguous and finite host of humanity's endeavours. The volume appeals to academics, researchers and professionals with a particular interest in the current environmental crisis, offers solid insights into the ways human societies construe nature and hopefully will embark on the protection of the ecosphere.*
