Why Samantha Kleinberg 2015-11-16 Can drinking coffee help people live longer? What makes a stock's price go up? Why did you get the flu? Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You'll learn how to question claims, identify causes, make decisions based on causal information, and verify causes through further tests. Whether it's figuring out what data you need, or understanding that the way you collect and prepare data affects the conclusions you can draw from it, Why will help you sharpen your causal inference skills.

A Shot of Faith (to the Head) Mitch Stokes 2012-04-16 Secular, skeptical, disillusioned. These are the traits that mark our age—encouraged by outspoken atheists who insist that faith is naïve and belief is dangerous. But what if the atheists are the irrational ones? Can their beliefs withstand the rigorous examination that they demand from others? In *A Shot of Faith of Faith to the Head*, Mitch Stokes, Senior Fellow of Philosophy at New Saint Andrews College, dismantles the claims of skeptics and atheists, while constructing a simple yet solid case for Christian belief. This profound yet accessible book proves the rationality, consistency, and reliability

of the Christian approach to science and life. If you have ever doubted that your beliefs can stand up to scrutiny—if you’ve ever doubted your beliefs—this book dissolves the questions. For atheists, it is a wake-up call. For Christians, it’s A Shot of Faith to the Head. Endorsements: "A Shot of Faith to the Head is much more than a defense of Christianity; it takes the offensive against the secularist thinking that enamors so many in the West. With the thoroughness of a scholar and the confidence of experience, Mitch Stokes demonstrates the intellectually dubious nature of the so-called "New Atheism" and provides Christians with a much needed handbook for the questions they will surely face once they are outside of the safe confines of their Christian communities. I highly recommend it." –Larry Taunton, founder of the Fixed Point Foundation and author of The Grace Effect "A fine book: lively, clear, accessible, but also deep, and deeply competent." –Alvin Plantinga, Emeritus Professor of Philosophy at the University of Notre Dame, author of Where the Conflict Really Lies: Science, Religion, and Naturalism, Oxford University Press "The Bible identifies Jesus as the Word and as the Light, available therefore to the mind as well as the heart. Of all religions, Christianity most invites one to think as well as to believe, and in this troubled time that invitation is still more urgent to take up. Here is a book by a skilled thinker, showing how better to think about faith. It is a worthy task, ably achieved." –Larry P. Arnn, PhD, president, Hillsdale College "This book is what snarky atheists have coming to them for their dismissive claims and unfounded arrogance. Written not to convince atheists but to help Christians defend themselves and the Christian faith, A Shot of Faith to the Head takes the best tools of top-notch apologetics and philosophy and puts them in the hands of every believer. Even better, it’s easy and fun to read, winsome, witty, filled with sharp thinking, and well-researched. As a professor and pastor, I’ll be assigning this book in my apologetics courses and would recommend it to every Christian. It displays strategic answers to questions and objections every Christian has encountered." –Justin Holcomb, pastor, Mars Hill Church; executive director of the Resurgence; adjunct professor of theology, Reformed Theological Seminary

Fault Diagnosis and Fault-Tolerant Control and Guidance for Aerospace Vehicles Ali Zolghadri 2013-10-07 *Fault Diagnosis and Fault-Tolerant Control and Guidance for Aerospace* demonstrates the attractive potential of recent developments in control for resolving such issues as flight performance, self protection and extended-life structures. Importantly, the text deals with a number of practically significant considerations: tuning, complexity of design, real-time capability, evaluation of worst-case performance, robustness in harsh environments, and extensibility when development or adaptation is required. Coverage of such issues helps to draw the advanced concepts arising from academic research back towards the technological concerns of industry. Initial coverage of basic definitions and ideas and a literature review gives way to a treatment of electrical flight control system failures: oscillatory failure, runaway, and jamming. Advanced fault detection and diagnosis for linear and linear-parameter-varying systems are described. Lastly recovery strategies appropriate to remaining actuator/sensor/communications resources are developed. The authors exploit experience gained in research collaboration with academic and major industrial partners to validate advanced fault diagnosis and fault-tolerant control techniques with realistic benchmarks or real-world aeronautical and space systems. Consequently, the results presented in *Fault Diagnosis and Fault-Tolerant Control and Guidance for Aerospace*, will be of interest in both academic and aerospace-industrial milieux.

Undressing Cinema Stella Bruzzi 2012-10-12 From Audrey Hepburn in Givenchy, to sharp-suited gangsters in Tarantino movies, clothing is

central to film. In *Undressing Cinema*, Stella Bruzzi explores how far from being mere accessories, clothes are key elements in the construction of cinematic identities, and she proposes new and dynamic links between cinema, fashion and costume history, gender, queer theory and psychoanalysis. Bruzzi uses case studies drawn from contemporary popular cinema to reassess established ideas about costume and fashion in cinema, and to challenge conventional interpretations of how masculinity and femininity are constructed through clothing. Her wide-ranging study encompasses: * haute couture in film and the rise of the movie fashion designer, from Givenchy to Gaultier * the eroticism of period costume in films such as *The Piano* and *The Age of Innocence* * clothing the modern femme fatale in *Single White Female*, *Disclosure* and *The Last Seduction* * generic male chic in *Goodfellas*, *Reservoir Dogs*, and *Leon* * pride, costume and masculinity in 'Blaxploitation' films, *Boyz n The Hood* and *New Jack City* * drag and gender confusion in cinema, from the unerotic cross-dressing of *Mrs Doubtfire* to the eroticised ambiguity of *Orlando*.

Ulysses and Us Declan Kiberd 2010-06-03 In *Ulysses and Us*, Declan Kiberd argues that James Joyce's *Ulysses* offers a humane vision of a more tolerant and decent life under the dreadful pressures of the modern world. As much a guide to contemporary life as it is virtuoso work of literary criticism, *Ulysses and Us* offers revolutionary insights to the scholar and the first-time reader alike. Leopold Bloom, the half-Jewish Irishman who is the hero of James Joyce's *Ulysses*, teaches the young Stephen Dedalus (modelled on Joyce himself) how he can grow and mature as an artist and an adult human being.

Bloom has learned to live with contradictions, with anxiety and sexual jealousy, and with the rudeness and racism of the people he encounters in the city streets, and in his apparently banal way sees deeper than any of them. He embodies an intensely ordinary kind of wisdom, Kiberd argues, and in this way offers us a model for living well, in the tradition of the literature upon which Joyce drew in writing *Ulysses*, such as Homer, Dante and the Bible. 'Declan Kiberd's brilliantly informed and highly entertaining advocacy liberates Joyce's greatest book from the dungeon of unreadable masterpieces.' Joseph O'Connor
