The Datsun Roadster Book - Part II Technical and Service Manual Scott Sheeler 2010-04 The Datsun Roadster Book is THREE Parts. Over 880 pages across all three (3) volumes! It still has 20 road tests and racing articles - most not seen in the US. It still has 44 pages of translations and pictures from Fairlady I and II. It still has 13 old Datsun Competition Bulletins including one of the very FIRST competition catalogs from 1970. In the three volumes we have over 180 color pictures and illustrations. We've included 3 classic Datsun Service Bulletins for more historical information. This is PART II - The Technical and Service Manual. One of the things that had been sorely lacking since the day the first roadster arrived on these shores was a good service manual that described day-to-day maintenance and service tasks in English - oh yeah, and made sense! All the manuals of the period were original NISSAN publications that were translated in the early and mid-60's. Coming before the time of Americanization of the staff, the documents were pretty atrocious if you just wanted to adjust the valves, set the timing, replace brakes, or something like that. Of course, they did spend several pages describing how to set the clearances on the differential gears - if you were in the mood to rebuild your differential! In 1986 we began writing service manual information to include with our parts catalog. We tried to cover the major things like engine and gearbox rebuilds figuring that most people could find someone who could set the valves or change the oil. Since the original version in 1986 we have expanded the service manual and added additional topics. Each volume of The Datsun Roadster Book is sold separately so you can buy what you need when you need it. Check Amazon for all three of our volumes. Thanks for you for your Kindle purchase.

Alfa Romeo DOHC Engine High-Performance Manual Jim Kartalamakis 2006-05-15 Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.

The Datsun Roadster Car Dee Hoelter 2021-03-15 The Datsun Roadster was a lightweight automobile produced by Nissan in the 1930s. The series was a predecessor to the Fairlady sports cars, and was an example of the earliest passenger cars produced in Japan. We added some more road tests - many from foreign magazines - some more brochures, three 1960's vintage Datsun Service Bulletins, and a 20-page color spread from the from October 2007 "Z File - Fairlady and Fairlady Z History". We got permission to publish these pages courtesy of our "roadster friend in Japan" and D.R.F.C. member, Takeshi Izuka. Takeshi, by the way, is the proud owner of an "imported" LHD 1969 2000 that he has maintained in showroom condition.
