Studying The Usual Suspects Judith Gunn 2006 ""The story of The Usual Suspects has the kind of "rags to riches" back story that makes not only the film itself, but the tale of its creation a tale worth telling. Inspired by a magazine headline, it was a poster before it was a screenplay, yet it stands in opposition to the High Concept Hollywood movie. Studying The Usual Suspects is an analysis of a film that is both a ripping yarn and an exercise in virtuoso technique. Author Judith Gunn offers: a thorough introduction to semiotics as a way of approaching the multiple meanings of

the film; a consideration of the film's noir antecedents and influences; a discussion of the film's playful approach to narrative; an overview of John Ottman's unique role as both composer and editor and how this affects the finished article, including a shot-by-shot analysis of the dramatic and mysterious opening sequence; and a definitive account of the film's genesis from idea to film festival acclaim"--Abstract

The Art of Screen Time Anya Kamenetz 2018-01-30 Finally: an evidence-based, reassuring guide to what to do about kids and screens, from video games to social media. Today's babies often make their debut on social media with the very first sonogram. They begin interacting with screens at around four months old. But is this good news or bad news? A wonderful opportunity to connect around the world? Or the first step in creating a generation of addled screen zombies? Many have been quick to declare this the dawn of a neurological and emotional crisis, but solid science on the subject is surprisingly hard to come by. In *The Art of Screen Time*, Anya Kamenetz -- an expert on education and technology, as well as a mother of two young children -- takes a refreshingly practical look at the subject. Surveying hundreds of fellow parents on their practices and ideas, and cutting through a thicket of inconclusive studies and overblown claims, she hones a simple message, a riff on Michael Pollan's well-known "food rules": Enjoy Screens. Not too much. Mostly with others. This brief but powerful dictum forms the backbone of a philosophy that will help parents moderate technology in their children's lives, curb their own anxiety, and create room for a happy, healthy family life with and without screens.
