Future of Jobs IntroBooks Team Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted - a lot will be contingent on devising the right policies and institutes in place.

Vacation Decision Making Alain Decrop 2006-01-01 The focus of this book is on holiday planning and decision making, which is the cornerstone of tourist behaviour and tourism marketing. The first three chapters deal with the basics, including an overview of decision-making paradigms and variables (chapter 1), a critical review of existing tourist behaviour models (chapter 2) and a description of the methods that may be used for studying holiday decision making (chapter 3). The chapters that follow relate the findings of an in-depth qualitative and interpretative study that followed the decision making process of 25 Belgian households during a whole year. Chapter 4 discusses the context in which holiday decisions are made. In the next two chapters, the focus is on the decision-making process in itself both at the generic and holiday levels (chapter 5) and at the destination level (chapter 6). Post-experience processes are investigated in chapter 7, whereas group processes are the particular focus of chapter 8. Chapter 9 presents the integrative and conclusive part of the book where a new typology of holidaymakers is proposed. The book has a subject index.

Tourism in South-East Asia Michael Hitchcock 2018-11-15 South-East Asia has developed rapidly as a tourist destination, but what are the effects of this growth upon the peoples of the region? How far is it possible to control the impact of tourism whilst also supporting the industry's role in the region's development? This book, first published in 1993, attempts to answer these questions by providing a critical analysis of the nature of tourism as it has developed in the area. It questions commonly held assumptions about tourism both from a western perspective and from the point of view of policy makers in the region. It explores central issues such as the impact of tourism on the environment, culture and the economy, placing it within an historical and political context in order to assess the implications of current developments. The contributors use case studies from a variety of countries on such aspects as the sex industry, dream holidays and rural handicrafts, assessing tourist perceptions, both domestic and international, and policy decisions. By taking a long-term perspective it should provoke thought on the ways to develop sustainable tourism for the future.

Economic Crisis, International Tourism Decline and Its Impact on the Poor World Tourism Organization 2013 The 2009 global economic crisis has significantly impacted international tourism, causing a decline in international tourist arrivals and international tourism revenues. This study looks into the effects of the decrease in international tourism demand on the employment, income opportunities and the livelihood of poor and vulnerable groups, as well as on the capacity of households to cope with such shocks. The report combines a comparative large-N macro-economic analysis with case studies on the Maldives, Costa Rica and Tanzania.

Tourism Impacts, Planning and Management Peter Mason 2012-08-06 Tourism Impacts, Planning and Management is a unique text, which links these three key areas of tourism: impacts, planning and management. Tourism impacts are multi-faceted and therefore are difficult to plan for and manage. This book looks at all the key players involved - be they tourists, host communities or industry members - and considers a number of approaches and techniques for managing tourism successfully. Divided into four parts, this text discusses: * The growth, development and impacts of tourism * Tourism planning and management: concepts, issues and key players * Tools and techniques in tourism planning and management: education, regulation and information technology * The future of tourism planning and management: issues of sustainability and the future Up-to-date, international case studies are used, for example the impacts of 9/11 and terrorism

in Bali, to illustrate and provide a real-life context for the theories discussed. Exercises are also included to consolidate learning.
